(a)
trapped
N at 15 r_s
N, before release
|v| at 15 r_s
|v|, before release
clock rate N and inflow speed |v|
radius r/r_s
(b)
mean radius of the matter
surface forms
2GE
(whole object)
outer edge of
trapped region
closes 17.4,
reopens 18.4
radius r/r_s
time at infinity T/r_s
(c)
averaging width 2 spacings
4 spacings (as (a),(b))
8 spacings
trapped where negative
depth of trapping, min over r of N − |v|
time at infinity T/r_s
