(a)
thermal budget at T_H
excess entropy beyond the cut (nats)
time at infinity T/r_s
cut at 2 r_s
cut at 16 r_s
cut at 30 r_s
(b)
formation's light arrives
Hawking flux
collar flux / Hawking flux, L_{coll}/L_H
time at infinity T/r_s
(c)
cut at 2 r_s
cut at 16 r_s
cut at 30 r_s
fields frozen from here →
thermal lifetime $3.9 \times 10^5\, r_s$
excess, lowest channel (nats)
time at infinity T/r_s
