Page curve from self-consistent closure
$S_R(t) = \min\{S_{BH}(0) - S_{BH}(t),\ S_{BH}(t)\}$
Early branch: $S_{BH}(0) - S_{BH}(t)$
Late branch: $S_{BH}(t) = \alpha_S A_H(t)/a^2$
$t_{Page}/t_{evap} \approx 0.646$
$\alpha_S = 0.00122$
Radiation entropy $S_R(t)/S_{BH}(0)$
