(a) Background: MI vs shell index
MI(n, n+d)
Shell index n
d=1
d=2
d=3
d=4
d=5
d=6
d=7
d=8
(b) Mean MI vs distance
Mean MI(d)
Distance d (shells)
Background (odd d)
Source (V0=0.03)
Smeared (odd d)
Generic (ε-broken)
(c) Smeared (V0=0.03): MI vs shell index
MI(n, n+d)
Shell index n
(d) Truncation error ratio
MI(d) / MI(1)
Distance d (shells)
Source (V0=0.03)
Generic (ε-broken)
Background (odd d)
1% level
10⁻⁶ level
