Embedding: cone angle vs horizon
$V_0 = 0.01$ ($\bar{N}_{\min} = 0.96$, sub-critical)
$V_0 = 0.05$ ($\bar{N}_{\min} = 0.76$, moderate)
$V_0 = 0.066$ ($\bar{N}_{\min} = 0.56$, near-critical)
Schwarzschild exterior ($dR/d\rho = 0$)
Classical GR ($R \to 0$)
sub-critical
near-critical
$dR/d\rho = \bar{N}_{\min} = 0.56$
$dR/d\rho = 0$
(horizon)
$R_{\min} = a$
Classical singularity
Area radius $R\,/\,a$
Proper distance $\rho\,/\,a$
