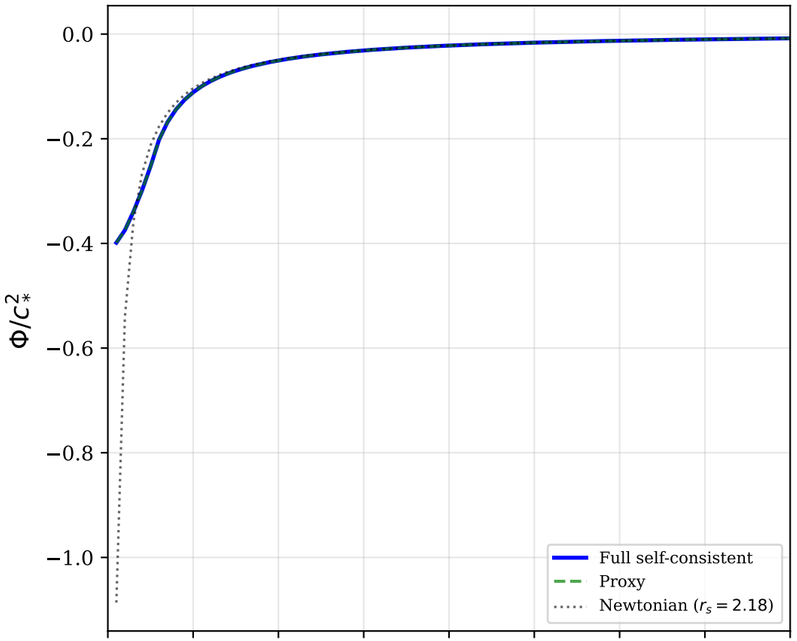
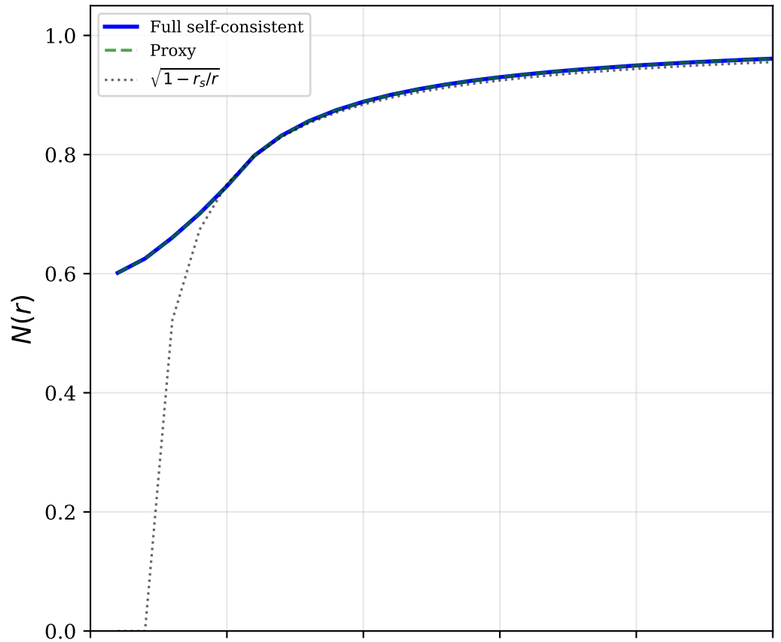
Fully self-consistent vacuum solver

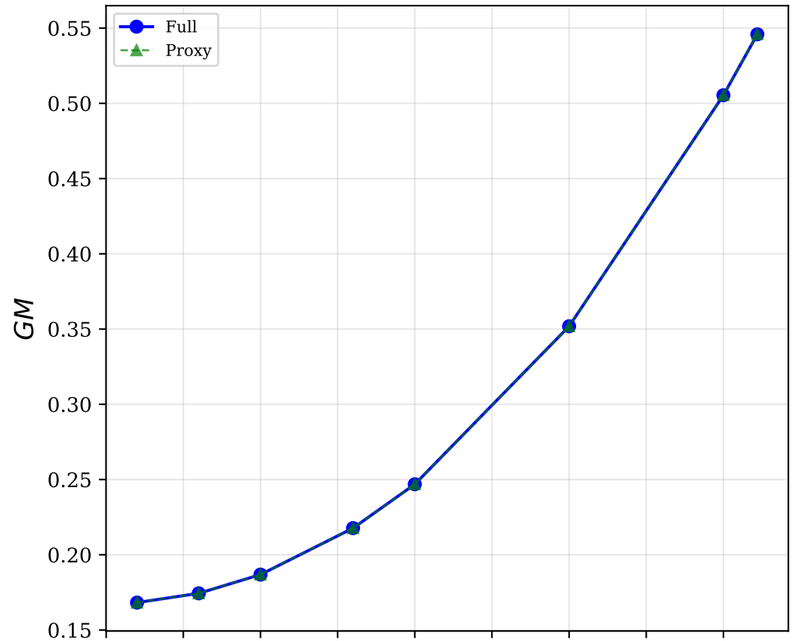
(a) Potential at $\beta_0 t_0 = 2.11$



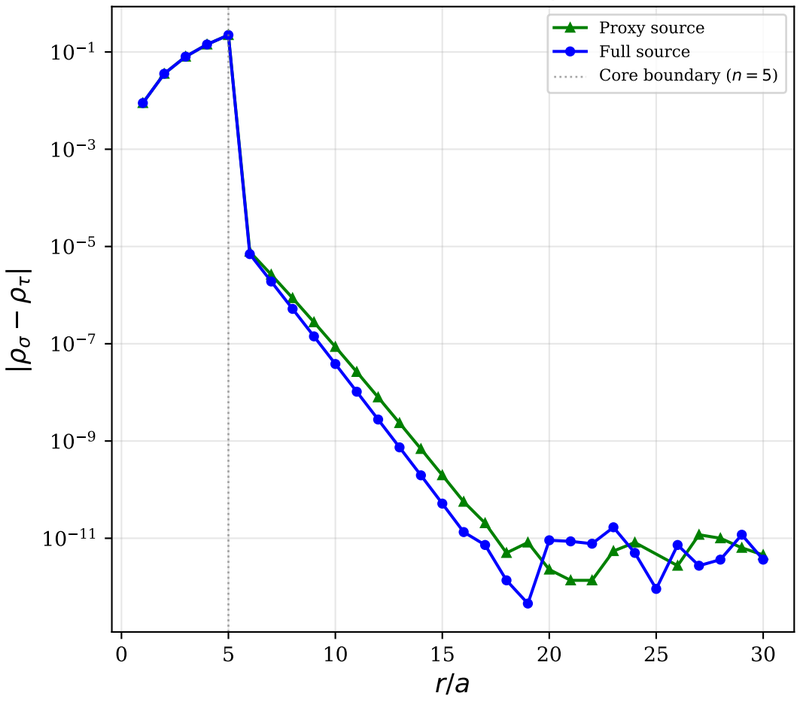
(b) Lapse at $\beta_0 t_0 = 2.11$



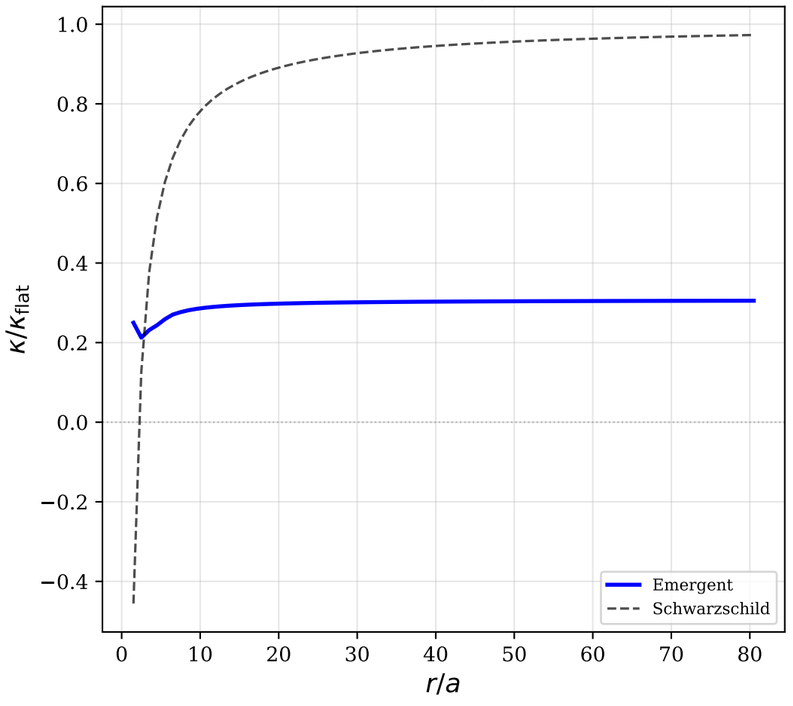
(c) Gravitational mass vs temperature

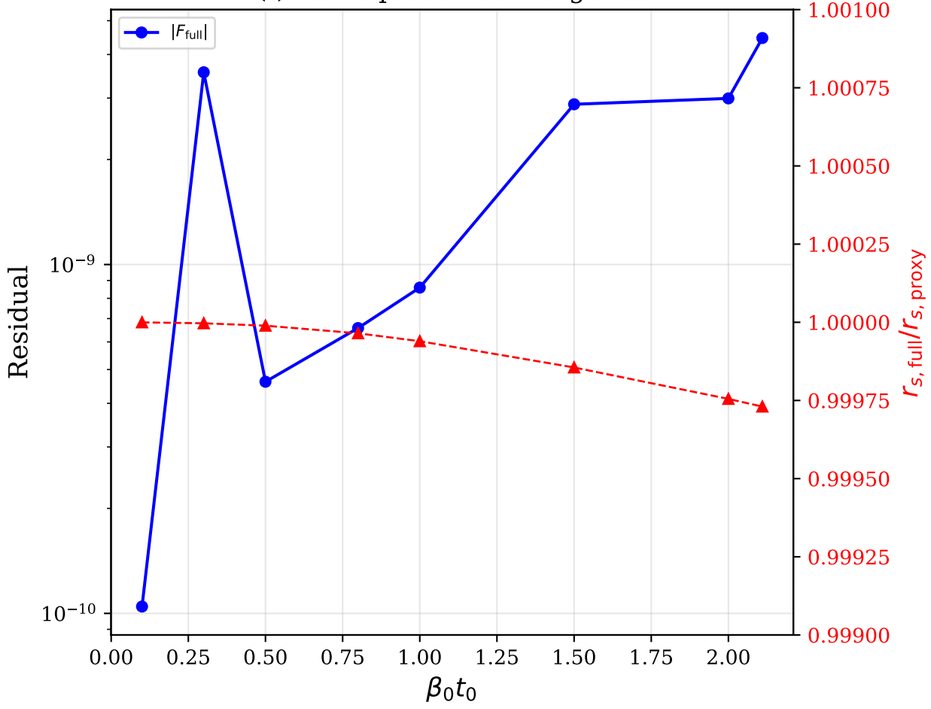


(d) Source localization at $\beta_0 t_0 = 2.11$



(e) Co-metric at $\beta_0 t_0 = 2.11$





(f) Full equation convergence
